22/05059/TPO	Champions Lodge		Oak (Marked 1) - To prune lowest limb to the west overhanging neighbouring property, cut back to the first cluster of small branches approximately 3-4 metres from the branch collar. Approximate pruning points can be seen in the attached illustrated images. Plus removal of low epicormic growth & deadwood - Reason – Maintenance	A.S.
22/05064/TPO	11	Brunel Way	G1 - Cherry - Fell - Reason - Is causing structural damage to a community pathway and private pathway to houses. The tree is the least dominant in a group of 3 larger trees, the tree in question is growing into the lower crown of another cherry tree, causing rubbing branches and damage to lower growth. Tree is very clearly causing damage to pathways both community owned and private, causing tripping hazards. Potentially causing future damage to houses and drains.	A.S.
